

Shadowhawk flashlights: warning

The Shadowhawk is the worst flashlight I have ever bought. I bought four. One stopped work immediately, the company replaced it. Another had the battery corrode within one month, and damaged the flashlight- the company refused to fix or exchange it. A third simply stopped working after 1 1/2 months, and the company refused to fix or exchange it. I am left with one working Shadowhawk. I am a forensic psychologist and police trainer- I DO NOT RECOMMEND THIS FLASHLIGHT! It is a flashlight that does not last.
